Project Title

Marketing Performance Analysis & ROI Optimization Dashboard

Objective

To analyze multi-channel marketing campaign performance and identify high-performing channels using SQL and Power BI.

Tools Used

- Excel (Raw Data Collection)
- SQL (Data Cleaning & KPI Calculation)
- Power BI (Data Visualization & Insights)

KPIs Calculated

- Total Revenue
- Total Spend
- Profit
- ROI
- Conversion Rate
- Cost Per Click (CPC)

Key Insights

- Revenue increased month-over-month from January to March.
- YouTube generated the highest revenue and ROI.
- Meta showed the lowest ROI compared to other channels.
- CPC remained stable across channels.

Business Recommendations

- Increase budget allocation to YouTube campaigns.
- Optimize Meta targeting to improve ROI.
- Monitor CPC monthly to control acquisition costs.
